# NiceLabel – The way to perfect product labeling

A rapid and reliable method of labeling products is becoming increasingly important in the warehouse, in dispatch and in other areas of logistics. Only those companies which are in the position to track their goods precisely and to intervene in the production processes at any time truly have the value added process under control.

The key to this concept is the 'on-demand' label. It is printed exactly where and when it is required and contains current information from your database. Alternatively, it is available as a standalone solution on request.

The concept is underpinned by a complex information process which requires high-performance software - and that is exactly what NiceLabel is: labeling software designed to meet the very highest expectations.

## How NiceLabel works for you

NiceLabel supports modern identification standards, all barcodes commonly in use, checksum calculations and boasts a variety of options that make label design simpler and more efficient. Any type of label layout is possible: You can combine texts, paragraphs, barcodes and graphics any way you chose and can work with both fixed and variable values.

The database assistant offers you support and enormously facilitates individual, complete data control for your labels. Whether you are using standalone systems or working in a network, specially developed drivers always optimize print performance reliably.

**NiceLabel -  
Your solution for professional labeling:**

- High-performance and user-friendly.
- Modules to suit the environment.
- Operational reliability thanks to excellent technology.
- Technical support and assistance.
- In 22 languages.
- Microsoft certified.

## NiceLabel Suite

The end-to-end software solution for top design requirements and all printer types. Individually matched to the requirements of the data flow and your printer, the NiceLabel Suite makes label production a simple, error-free issue. A wide range of interface options allows you to print labels in any environment, whether it be in a network or on a standalone system.

NiceLabel offers tailored software solutions in three versions for even more personalized and efficient label design.

## NiceLabel Pro

The full version for professional label design and top quality printing. Full database support and all integration options are included. The extensive range of functions and modules make NiceLabel Pro the perfect, user-friendly solution for all labeling requirements.

## NiceLabel Express

The basic software for all labels with standard barcodes. This entry-level version offers the user a wide range of design elements from the professional NiceLabel versions, and is wizard-based, making it very easy to operate.

# A brief overview of the feature modules

### Simple label printing

NiceLabel offers a range of pre-formatted design elements and wizards which enable a rapid and simple production of labels, while still maintaining individuality.

### Compliance Labeling Design

Printing production and logistics labels to meet the industry-specific requirements is now easier than ever before. NiceLabel can take data from any standard database, import user-defined print formats and reliably create the required Compliance Label.

### System integration

NiceLabel is exceptionally easy to integrate and can be controlled from any Windows application as the customer requires. The software enables printing from any network system and from any device connected via TCP/IP or via a serial interface.

### ERP connectivity

NiceLabel supports connection to ERP systems by means of an open programming interface, database support and a comprehensive range of data recognition options. Reliable labeling data can thus be obtained even from unstructured sources - without needing to make changes to the ERP system.

### Standalone and non-Windows printers

NiceLabel can print to thermal transfer printers that have not been specifically designed for offline operation without the need for a PC connection. NiceLabel is also mobile-capable and now supports wireless Windows CE devices. The latest version of NiceLabel also opens up the entire Linux world.

# The NiceLabel versions

NiceLabel versions	Suite	Pro	Express
Certified for use with Microsoft Windows 95, 98, NT, ME, 2000 and XP	✓	✓	✓
Multi-language user interface and label design with Unicode support	✓	✓	✓
Modern user interface with powerful wizards and tools	✓	✓	✓
Fully wizard-controlled label creation			✓
Real print preview saves time, labels and money	✓	✓	✓
Additional tools for paragraphs, text positioning, Rich Text Format, label inspector	✓	✓	
For all Windows-based printers and with additional support for thermal transfer printers (NiceDrivers)	✓	✓	✓
All standard graphics formats and elements are supported (e.g. JPG, WMF, GIF, BMP)	✓	✓	✓
Clipart gallery and fonts with industrial symbols	✓	✓	
User management and log files on the printed labels	✓	✓	
<b>DATA PROCESSING AND CONTROL</b>			
Query fields with data checking limited	✓	✓	limited
User definable counter with transfer and increment limited	✓	✓	limited
Date and time fields in various formats	✓	✓	✓
Linked fields, Visual Basic Scripting for advanced data processing	✓	✓	
<b>BARCODE AND RFID SUPPORT</b>			
All standard barcodes, 2-D, UCC.EAN 128, linear and composite RSS	✓	✓	✓
Extended support (FACT, HIBC, Transfer Syntax) and barcode compatibility checking	✓	✓	
Support for RFID Smart Labels	✓	✓	
<b>DATABASE SUPPORT</b>			
Import of text, paragraphs, barcodes and graphics from databases limited	✓	✓	limited
Standard text file (ASCII) support	✓	✓	✓
Support for all databases via BDE, ODBC, OLE DB or ADO drivers	✓	✓	
Multiple database connections, query generator and freely definable SQL scripting	✓	✓	
NiceData database manager	✓		
<b>INTEGRATION, ERP &amp; WMS CONNECTIONS</b>			
Internal command language (print file, command language options, DDE)	✓	✓	
ActiveX programming interface	✓	✓	
Label export to SAP R/3 (ITF files)	✓		
Support for standalone printing	✓	✓	
NiceWatch - central print server with data filtering support	✓		
NiceWatch - serial (COM) interface monitoring	✓		
NiceWatch - network, Internet and email printing (POP3 and TCP/IP sockets)	✓		
<b>SPECIAL FEATURES</b>			
NiceForm - creation of data input masks and print applications	✓		
NiceMemMaster - for downloading fonts and graphics	✓		
<b>ADDITIONAL VERSIONS</b>			
Print Only	✓	✓	
Network	✓		
"with Windows CE" support (mobile and wireless label printing, Pocket NiceLabel)	✓		
"with Linux" support (Linux label printing and data module, NiceLabel for Linux)	✓		

\* Full Unicode data processing in NiceLabel Pro on Windows NT, 2000, XP and 2003 platforms

The name Avery Dennison is associated worldwide with perfect labeling. In addition to software, we also offer hardware, consumables and service.
